Item I. Description of the Site

A small chemical plant manufactures specialty chemicals on this site of about 31-1/2 acres. The plant was started in 1950. This report is for closed facilities on the site. Active hazardous waste management facilities on the site have interim status under RCRA.

Six impoundments on the site were used for treatment, storage and disposal (one clean water basin, two settling ponds, and three limestone-filled neutralization pits). The total area was about 1/2 acre. All have been filled in. The settling ponds were dredged of sludge and filled with soil when they were closed.

A small area near or under the parking lot is suspected of being used for disposal of building materials and waste sludge in the early fifties. A few drums of waste may have been buried in the lower part of the plant.

JUN 11 1981

Pit area sludge removed and filled with clean soil.
